

Kandungan

Demo Playbook — Vendor School / Tuition / Preschool Management System

1. Cara guna playbook ni
2. Priority tiers
3. Tier 1 — section per vendor
4. Tier 2 — section per vendor
5. Tier 3 — self-serve reference (sign up, klik, screenshot)
6. Master tracker
7. Selepas semua demo — comparison matrix

Demo Playbook Vendor

Panduan booking demo, soalan Zoom, dan feature yang wajib direkod untuk setiap vendor

Minda Optima · Dokumen dalaman · 29 Sep 2026

Nota untuk staff: Harga, bilangan pelanggan dan rating dalam dokumen ni datang dari search snippet, bukan dari website vendor secara langsung. Yang ditanda (*snippet*) atau (*unverified*) kena sahkan masa demo sebelum guna untuk keputusan.

Untuk siapa: founder yang nak tengok satu-persatu sistem vendor (Zoom demo + free trial), faham keseluruhan sistem, dan screenshot / screen-record setiap feature sebagai rujukan masa bina sistem sendiri. **Sumber:** 6 fail nota research dalam `research_notes/Pasaran school management system Malaysia/` (tarikh research 29 Sept 2026). Semua harga dan angka pelanggan dalam dokumen ni ikut nota tu — kebanyakan datang dari search snippet, bukan dari page vendor terus. Yang ditanda **(unverified)** maksudnya kena confirm masa demo. **Peraturan asas:** kau ni "pelanggan potential" — pengusaha rangkaian pusat bacaan kanak-kanak ~20 lokasi. Kau **bukan** developer, **bukan** kompetitor. Jangan sebut pasal sistem sendiri langsung.

1. Cara guna playbook ni

1.1 Aliran kerja (per vendor)

- Buka section vendor tu dalam playbook ni, baca "Whole system in 5 lines" dulu supaya kau dah ada mental model sebelum demo
- Hantar mesej booking (template bawah) — email / contact form / WhatsApp
- Bila dapat slot, masukkan dalam calendar + siapkan satu page Notion / Google Doc untuk vendor tu (guna template section 1.5)
- Masa demo: record, tanya soalan universal (1.4) + soalan khusus vendor, tick checklist screenshot
- Lepas demo: minta trial / sandbox account, minta pricing PDF, minta recording mereka kalau ada
- Dalam 24 jam: rename recording, sort screenshot, isi Master Tracker (section 6) dan comparison matrix (section 7)

1.2 Template mesej booking (English — copy paste, tukar nama vendor)

Guna yang sama untuk email, contact form, atau WhatsApp. Pendek, macam pelanggan biasa.

Subject: Demo request – multi-branch children's reading centre (Malaysia)

Hi [Vendor] team,

I run a chain of children's reading centres in Malaysia (about 20 locations, mostly primary-age kids, small group classes). We are evaluating a system to manage enrolment, class schedules, attendance, fee collection and parent communication across all branches. Could we book a 45–60 min Zoom demo of [Product]? I would also appreciate a trial account and your pricing for a multi-branch setup.

Thanks,
[Nama] | [Nama syarikat] | [No. telefon]

Nota:

- Kalau vendor tanya "which system are you using now?" — jawab "mostly spreadsheets and WhatsApp groups" (ni memang status quo industri, nota research pun cakap macam tu). Jangan sebut "kami tengah bina sendiri".
- Kalau vendor tanya bajet — jawab "depends on what's included; we want to compare a few options first".
- Kalau vendor tak ada butang demo, cari **Book a Demo / Contact / WhatsApp** di homepage. Kebanyakan vendor MY kecil lebih cepat respond WhatsApp daripada email.

1.3 Setup rakaman Zoom (buat sekali, guna setiap demo)

- Zoom: **Record to the Cloud** on, plus **Local Recording** on sebagai backup (Settings > Recording)
- Zoom: enable "Record active speaker, gallery view and shared screen separately" supaya screen share bersih tanpa muka
- Awal demo, minta izin: *"Do you mind if I record this so I can share with my ops team?"* — 99% vendor okay, dan ni juga cover PDPA basic courtesy
- Backup recorder: **OBS** (free) atau **Loom** jalan sekali gus — kalau Zoom cloud recording gagal, kau masih ada copy
- Screenshot hotkey: Windows `Win + Shift + S`, Mac `Cmd + Shift + 4`. Snap SETIAP screen yang vendor tunjuk, walaupun kau rasa tak penting — senang sort kemudian
- Naming convention fail (jangan lari dari ni):
- Video: `vendor_YYYYMMDD_module.mp4` → contoh `aone_20261006_billing.mp4`, `aone_20261006_parentapp.mp4` (potong video panjang ikut modul lepas demo)
- Screenshot: `vendor_YYYYMMDD_screen-name.png` → contoh `remmu_20261007_attendance-marking.png`
- Satu folder per vendor dalam Google Drive / Dropbox: `/Vendor Demos/<vendor>/`
- Satu page Notion / Google Doc per vendor — guna template 1.5 bawah
- Kalau vendor bagi trial account: record sendiri satu video "walkthrough" 10–15 minit klik semua menu, sebelum trial expire
- Sedia dua monitor kalau boleh: satu Zoom, satu playbook ni (untuk tick checklist live)

1.4 Soalan universal — tanya SEMUA vendor

Tanya dalam order ni; catat jawapan dalam page vendor. Kalau jawapan "not sure", minta mereka follow up by email (ni sendiri satu signal kualiti support).

Harga & kontrak

- Pricing model: per student? per branch? flat? Ada setup fee? Ada transaction fee atas bayaran?
- Untuk 20 branch × (anggaran) 100–150 student per branch — berapa sebulan / setahun? Minta quotation bertulis
- Contract lock-in: monthly? annual? Ada penalty kalau cancel? Harga naik tahun depan macam mana?
- Onboarding: berapa lama dari sign up sampai semua branch live? Siapa buat data migration (student list dari Excel)? Ada charge?

Multi-branch

- ☐ Boleh tengok semua branch dalam satu login? Ada HQ dashboard vs branch dashboard?
- ☐ Boleh set harga / fee plan / jadual berbeza ikut branch?
- ☐ Staff boleh dilimit hanya nampak branch sendiri? Role & permission macam mana?
- ☐ Student boleh pindah branch tanpa hilang history?

Komunikasi

- ☐ WhatsApp: automated reminder je, atau two-way inbox? Guna official WhatsApp Business API atau click-to-chat link? Siapa tanggung kos mesej Meta?
- ☐ Ada in-app push? Parent tak install app — fallback apa (SMS / WhatsApp)?

Bayaran & compliance

- ☐ FPX / DuitNow QR / e-wallet / kad — gateway mana (Billplz, toyibPay, CHIP, Curlec, iPay88/Payex, senangPay, Stripe)? Fee per transaksi berapa?
- ☐ Recurring collection: ada FPX e-mandate / auto-debit? Atau parent kena klik link tiap bulan?
- ☐ Bayaran cash / bank transfer manual — macam mana reconcile? Boleh partial payment, sibling discount, deposit?
- ☐ LHDN e-Invoice (MyInvois): live ke? Consolidated e-invoice bulanan boleh? Parent boleh request individual e-invoice sendiri? Ada extra charge?
- ☐ PDPA Malaysia: data hosted mana? Ada DPO? Breach notification process? Boleh export semua data kalau kami keluar?
- ☐ Accounting export: Bukku / SQL Account / AutoCount / Xero — ada integration atau CSV je?

Produk

- ☐ Parent app: iOS + Android + Huawei? Parent boleh login web? Bahasa Melayu ada?
- ☐ Teacher app: mark attendance dari phone? Tulis progress note per session?
- ☐ Make-up class / replacement class: macam mana flow? Ada credit system?
- ☐ Waitlist & capacity per class ada?
- ☐ Reports: apa yang boleh export (CSV/Excel/PDF)? Ada BI dashboard?
- ☐ API / webhook / Zapier ada? Dokumentasi public?
- ☐ Roadmap 12 bulan — apa yang tengah dibina? (dengar apa yang mereka rasa kurang)
- ☐ Support: channel apa (WhatsApp group / email / phone)? Jam operasi? SLA?
- ☐ Boleh bagi nama 1-2 pelanggan multi-branch yang boleh kami tanya?

1.5 Template page Notion / Google Doc per vendor

```
# <Vendor> – demo <tarikh>
Website | Demo route | Contact person | Follow-up due
## Harga (quote bertulis: link)
## Modul yang ada (tick)
## Flow: enquiry → enrolment → schedule → attendance → billing → reporting
## Apa yang bagus (curi idea)
## Apa yang lemah (jangan ulang)
## Screenshot folder link | Video link
## Jawapan soalan universal (1.4)
## Jawapan soalan khusus vendor
## Red flags
```

2. Priority tiers

Tier 1 — WAJIB demo (competitor terus MY/SG + analog paling dekat)

AOne, LittleLives, REMMU, SimTrain, ClassFlow.my, Skooly, Anak2U, Oodlins, Classcard, Taidii, ASIS, Synorex, Yuran.my, Tuis.my, illumine, Mekar, BooknGo.

Kenapa: ni sistem yang pelanggan kau (dan pesaing kau) akan jumpa bila Google "sistem pusat tuisyen" / "tadika app". Mereka dah selesaikan masalah Malaysia-specific — FPX/DuitNow, WhatsApp reminder, LHDN e-Invoice, BM UI, harga RM50–250/centre. Kau kena tahu bar minimum yang parent dan admin dah biasa. Semua vendor ni ada aktiviti marketing 2025–2026 dalam nota (kecuali LittleLives MY yang last press 2019 — tapi dia market leader preschool SG dan ada 145–293 tadika MY, jadi tetap wajib).

Ada juga **Tier 1B** (section 3.18) — vendor MY/SG kecil / niche yang tak perlu demo penuh; cukup lawat website, sign up kalau free, atau WhatsApp tanya harga.

Tier 2 — berbaloi demo atau free trial untuk idea feature

Jackrabbit Class, iClassPro, Pike13, TutorCruncher, Teachworks, Brightwheel, Family, Playground, Xplor, Classe365, Gradelink, Fedena.

Kenapa: tak sesuai untuk Malaysia (USD, tak ada FPX, tak ada WhatsApp, quote-only) tapi mereka lebih matang 5–10 tahun dari vendor MY dalam benda tertentu: multi-location BI dashboard (Jackrabbit), flat per-location pricing (iClassPro), franchise stack + payroll (Pike13), branch model + API + tutor payroll (TutorCruncher), per-lesson billing + calendar (Teachworks), parent app feed + check-in + autopay (Brightwheel, Playground), cross-site occupancy report (Family), family app 3-in-1 (Xplor), modular SIS pricing (Classe365, Gradelink), open-source-turned-commercial (Fedena). Ambil UI pattern, jangan ambil pricing.

Tier 3 — self-serve reference, tak perlu demo

Sign up free trial / free plan, klik semua menu sendiri, screenshot. Respond.io, SleekFlow, Wati, Trello, ClickUp, Notion, Airtable, Fresha, Mindbody, Glofox, Zenoti, Calendly, ClassDojo, plus open source: Gibbon, RosarioSIS, openSIS, Unifiedtransform, skuul, FET.

Kenapa: ni bukan competitor — ni tempat curi pattern (WhatsApp inbox + lifecycle stage, kanban pipeline, waitlist + make-up credit, booking UX, parent comms freemium, data model SIS). Kebanyakan ada free tier, dan vendor besar tak akan buat demo untuk pusat tuisyen 20 cawangan pun. Open source pula: install / tengok demo site sendiri, baca schema DB.

3. Tier 1 — section per vendor

3.1 AOne (AOneSchool / AOnePay) — Malaysia

Website & demo route: <https://aone.com.my/> — contact page <https://aone.com.my/contact/> (harga "depends on the number of students", kena demo/quote). SG site <https://aoneschools.sg/>. Product pages: <https://aone.com.my/products/>, multi-branch <https://aoneschools.sg/products/multi-branch/>, finance <https://aone.com.my/products/finance/>. Help centre (baca SEBELUM demo): <https://aoneschools-help.freshdesk.com/en/support/solutions/articles/153000242966-what-information-needs-to-be-filled-in-when-e-invoice-is-enabled->

HQ / segment / pelanggan / harga: My AOne Learning Sdn Bhd, Malaysia, founded 2018, backed 500 Global. Segment: tuition, preschool, enrichment (music/dance/art/sports), language centre. Claim "4,000+ education providers across SEA" (dulu "2,000+" — vendor claim, tak diaudit). Harga: quote-based ikut bilangan student, tak public. E-Invoice hanya untuk pelanggan **Premium**.

Whole system in 5 lines:

1. Tiga produk: **AOneSchool** (pengurusan), **AOnePay** (kutipan yuran bulanan automatik, sejak 2017), **AOneMarketplace** (marketplace kelas, sejak 2016).
2. User: centre owner/admin (web), teacher (app), parent/student (app sahaja — **parent tak boleh login web**, mobile only).
3. Flow: enrolment → class schedule/booking → attendance check-in/check-out digital dengan notifikasi parent real-time → invoice auto + in-app payment (Billplz / iPay88-Payex) → e-Invoice LHDN (Premium) → centralised report semua branch.
4. Multi-branch/franchise: satu account, switch branch, laporan berpusat; role-based permission.
5. App "AOne" di App Store (id 1422236557), Google Play ([com.aoneschool](https://play.google.com/store/apps/details?id=com.aoneschool)), Huawei AppGallery. Parent login guna phone/email yang didaftarkan centre; satu account boleh pegang anak di beberapa sekolah. Support pelanggan melalui **WhatsApp group**.

Kenapa demo ni penting: Ni incumbent nombor satu yang parent dan admin di Malaysia paling mungkin dah pernah guna. Satu-satunya vendor tempatan dengan bukti jelas multi-branch + LHDN e-Invoice (termasuk consolidated e-invoice dan parent request e-invoice dalam app) + parent app matang + replacement class request oleh parent. Ini "bar" yang kau kena lepa.

Soalan khusus untuk vendor ni:

- ☐ Harga sebenar: per student berapa? Apa beza plan biasa vs Premium? E-Invoice kena Premium — berapa tambahan?
- ☐ AOnePay: take-rate atas setiap bayaran berapa? Fee Billplz / iPay88-Payex ditanggung siapa? Ada FPX e-mandate (auto-debit) atau parent klik pay tiap bulan?
- ☐ Kenapa parent tak boleh login web? Parent yang tak nak install app macam mana?
- ☐ Parent comms — WhatsApp betul-betul atau in-app push je? (nota: nampaknya push in-app; WhatsApp cuma untuk support vendor)
- ☐ Ada BM UI untuk parent app? Chinese?
- ☐ Replacement class request: parent request → siapa approve → ada limit / expiry?
- ☐ Export data penuh (student, invoice, attendance) kalau kami keluar — format apa?
- ☐ Integration accounting (Bukku / SQL / AutoCount)? Nota research tak jumpa bukti langsung.

Feature yang WAJIB screenshot / screen record:

- ☐ HQ dashboard multi-branch + screen "switch branch"
- ☐ Centralised report merentas branch (yang mana boleh filter by branch)
- ☐ Class schedule view (admin) + class booking flow
- ☐ Digital check-in / check-out UI (teacher side) dan notifikasi yang parent terima
- ☐ Student profile: enrolment, guardian, siblings, fee plan
- ☐ AOnePay: setup monthly fee collection, invoice auto-generate, reminder schedule
- ☐ In-app payment flow parent (Billplz/iPay88 screen) sampai receipt
- ☐ E-Invoice: field yang kena isi bila e-invoice enabled, consolidated e-invoice submission screen, parent "request e-invoice" dalam app
- ☐ Parent app home, attendance history, progress view, class materials, announcements
- ☐ Teacher app: mark attendance, progress update
- ☐ Role & permission settings (HQ vs branch admin vs teacher)
- ☐ Settings: fee plan / discount / late fee
- ☐ Report export (CSV/PDF) — senarai report yang ada

Perangkap / red flags (dari nota):

- Harga opaque, ikut bilangan student — kos naik bila kau grow. Minta quote bertulis untuk 3 saiz (1,500 / 2,500 / 4,000 student).
 - E-Invoice dikunci belakang Premium.
 - Bergantung pada gateway pihak ketiga (Billplz / iPay88-Payex) — setup Billplz kena "register then inform AOne support via WhatsApp group" (proses manual).
 - Parent mobile-only — friction untuk parent yang phone penuh / kongsi device.
 - Rating / install count Play Store tak dapat diambil dalam research — tanya terus atau check sendiri di Play Store.
 - Claim 4,000+ naik dari 2,000+ tanpa asas audit.
-

3.2 LittleLives — Singapore (preschool)

Website & demo route: <https://www.littlelives.com/> — pricing page <https://www.littlelives.com/pricing> ("package to match your price point"; contact sales@littlelives.com, hotline SG 89296707). Product: <https://www.littlelives.com/product/school-management-system>. FB Malaysia: <https://www.facebook.com/littlelivesmalaysia/>. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: HQ Singapore, office KL (expand ke MY 2017). Segment: preschool / childcare, bukan tuition. Claim 1,500+ sekolah (SG 750+; MY "293 preschools" satu sumber, "145" sumber lain). PSG-eligible SG. Harga quote-based, tak ada RM/SGD public.

Whole system in 5 lines:

1. Modul: attendance / digital check-in ("LittleLives Check In" app), real-time notification, fee management + automated invoicing, parent-teacher portal, student portfolio / progress report, staff & operations.
2. User: principal/admin (web), teacher (app), parent (app "Little Family Room for Parents" `com.littlelives.familyroom`, pengganti "LittleLives For Parents" `com.littlelives.littlefamilyroomv2` / iOS id 6752276737).
3. Flow: enrolment → daily check-in → daily health/activity update ke parent → invoice bulanan → portfolio/laporan perkembangan.
4. Two-way communication app dilancar Jan 2019 (SG + MY).
5. Parent app rating **3.29/5 dari ~1.1k rating, ~300k download**, last update 31 Jul 2026 (AppBrain via snippet).

Kenapa demo ni penting: Market leader preschool serantau dengan volume parent paling besar — kau boleh tengok apa yang parent Malaysia dah biasa (feed harian, check-in, portfolio) DAN apa yang mereka benci (rating 3.29). Preschool bukan tuition, tapi pattern parent app + portfolio + invoice terus relevan untuk pusat bacaan.

Soalan khusus untuk vendor ni:

- ☐ Ada package untuk enrichment / reading centre, atau preschool je? Term-based class boleh?
- ☐ Harga MY dalam RM untuk 20 centre?
- ☐ Payment gateway MY (FPX/DuitNow) — ada? LHDN e-Invoice — ada?
- ☐ App baru vs app lama: apa beza, bila migrate, kenapa tak ada Face ID auto-login?
- ☐ Complaint pengguna: inbox "keep loading", fail tak boleh buka, timestamp salah lepas upgrade, activity log tak sort by time — dah fix?
- ☐ Media storage: parent boleh delete photo/doc? Limit storage per child?
- ☐ BM UI ada? Multi-language auto-translate?
- ☐ Team support MY masih aktif? (last press MY 2019)

Feature yang WAJIB screenshot / screen record:

- ☐ Parent app home feed (activity/health/photo timeline)
- ☐ Check-in screen (teacher/kiosk) + notifikasi parent
- ☐ Inbox / two-way messaging UI (parent & teacher side)
- ☐ Student portfolio / progress report builder + PDF output
- ☐ Bulletin / announcement screen
- ☐ Fee module: fee plan, invoice auto, payment status, reminder
- ☐ Multi-centre / group view untuk HQ (kalau ada)
- ☐ Staff & operations module (roster, leave)
- ☐ Admin report list + export
- ☐ Settings: class, session, capacity

Perangkap / red flags (dari nota):

- Rating 3.29/5 — bug inbox, attachment, notifikasi buka hari yang salah, health timing salah (diaper 9:45am ditunjuk 11:00pm), tak boleh delete media, bulletin lama tak boleh delete.
- Preschool tool; segment tuition tak dibina.
- Press MY terakhir 2019 — mungkin fokus SG/China.
- Pricing tak telus; hotline SG.
- Angka MY bercanggah (145 vs 293) — tanya terus.

3.3 REMMU — Kulim, Kedah

Website & demo route: <https://remmu.com/> — pricing <https://remmu.com/pricing>, contact <https://remmu.com/contact>. Free plan ≤20 student — **sign up sendiri dulu**, then minta demo untuk multi-branch.

HQ / segment / pelanggan / harga: HQ Kulim, Kedah. Segment: tuition, martial arts, dance, fitness, swimming, music, daycare, 1-to-1 tutor. Customer count: tak jumpa. Harga: Free ≤20 student (full feature); Lite RM69/bln ≤100 student; Pro RM99/bln ≤300; Elite RM149/bln untuk besar. "All plans include FPX and mobile apps".

Whole system in 5 lines:

1. Modul: student, class attendance, fee automation, **WhatsApp reminder automatik, FPX payment** — semua plan.
2. User: admin (web), mobile app "REMMU" Android (`com.remmu.app`); iOS tak confirm.
3. Flow: daftar student → class/attendance → invoice bulanan auto → WhatsApp reminder → parent bayar FPX → receipt.
4. Harga ikut tier bilangan student, per centre.
5. Tak ada bukti e-Invoice, BM UI (site English), multi-branch dashboard — kena tanya.

Kenapa demo ni penting: Ni "price floor" pasaran MY — RM69-149 dengan FPX + WhatsApp built in. Parent di kawasan luar KL mungkin dah biasa dengan flow ni. Kau kena tahu berapa banyak feature boleh dapat pada harga ni, sebab pelanggan single-centre akan bandingkan kau dengan REMMU.

Soalan khusus untuk vendor ni:

- ☐ 20 branch = 20 subscription atau ada plan group? Ada HQ view?
- ☐ WhatsApp reminder: official API atau nombor biasa? Siapa bayar mesej? Template boleh edit?
- ☐ FPX gateway mana di belakang? Fee per transaksi? DuitNow QR ada?
- ☐ E-Invoice LHDN ada dalam roadmap?
- ☐ iOS app ada? Parent app atau admin app je?
- ☐ Berapa centre guna sekarang? Ada pelanggan multi-branch?
- ☐ Elite plan — limit student berapa, apa tambahan?
- ☐ Data export & cancel — boleh bila-bila?

Feature yang WAJIB screenshot / screen record:

- ☐ Pricing page (asal) — screenshot untuk rekod
- ☐ Dashboard admin (free account kau sendiri)
- ☐ Add student / guardian form
- ☐ Class setup + attendance marking UI
- ☐ Fee plan setup + invoice auto-generate schedule
- ☐ WhatsApp reminder template + log hantar
- ☐ FPX payment page yang parent nampak + receipt
- ☐ Mobile app REMMU: home, attendance, payment
- ☐ Report / export
- ☐ Settings: branch/centre, user roles
- ☐ Upgrade flow (Free → Lite) untuk tengok apa yang dikunci

Perangkap / red flags (dari nota):

- Tak ada customer count / testimonial — platform risk (team kecil).
- iOS tak confirm; BM UI tak confirm.
- Tiada bukti e-Invoice atau multi-branch dashboard.
- Harga tier ikut student — tanya apa jadi bila lebih 300.

3.4 SimTrain / SimTrain Eco (SIMIT Group) — Malaysia

Website & demo route: <https://simtrainsystem.com/> — MY pricing <https://www.simtrainsystem.com/?q=pricing-my>, SG pricing <https://www.simtrainsystem.com/?q=pricing-sg>, tuition success stories <https://simtrainsystem.com/tuition-centre>, SIMIT Group <https://simitgroup.com/simtraineco/>. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: SIMIT Group, Malaysia (market MY, SG, Indonesia). Segment: tuition, kindergarten, language school, art, math academy, music. Named customers: Pusat Tuisyen Intensif Hamka (350+ student), MC Plus Tuition Centre. Harga: **RM200-250/centre/bulan** ikut tier (Capterra snippet, unverified) + freemium plan basic.

Whole system in 5 lines:

1. Modul: admissions, student records, class scheduling, attendance, fee collection, payments, **e-Invoice** ("in one seamless platform").
2. User: admin (web), parent mobile app (komunikasi, bayaran, attendance real-time).
3. Flow: admission → class → attendance → fee → payment → e-Invoice.
4. Harga flat per centre (bukan per student) — mid-tier MY.
5. Blog 2026 aktif ("Best Tuition Centre Management Software in Southeast Asia Guide 2026").

Kenapa demo ni penting: Satu daripada tiga vendor MY dengan bukti e-Invoice dalam billing flow (AOne, SimTrain, ClassFlow). Harga flat per centre RM200-250 — ni band harga yang paling mungkin kau sendiri masuk. Ada pelanggan tuition 350+ student yang boleh dijadikan reference.

Soalan khusus untuk vendor ni:

- ☐ Beza plan RM200 vs RM250? Freemium had apa?
- ☐ 20 centre — ada group pricing dan HQ dashboard?
- ☐ E-Invoice: submit terus ke MyInvois atau via accounting software? Consolidated bulanan boleh?
- ☐ Gateway pembayaran mana? FPX / DuitNow fee?
- ☐ WhatsApp reminder ada? (nota tak sebut)
- ☐ BM UI ada untuk parent app?
- ☐ Boleh contact Pusat Tuisyen Intensif Hamka sebagai reference?
- ☐ Indonesia / SG version sama codebase — feature MY-specific dijaga siapa?

Feature yang WAJIB screenshot / screen record:

- ☐ Pricing page MY (screenshot asal)
- ☐ Admission form / enquiry → enrol flow
- ☐ Class scheduling screen (week view)
- ☐ Attendance marking (admin & parent view real-time)
- ☐ Fee setup + invoice + payment status
- ☐ E-Invoice screen: TIN field, submission, status dari LHDN
- ☐ Parent app: home, payment, attendance, message
- ☐ Multi-centre view (kalau ada)

- ☐ Report list + export
- ☐ User role settings

Perangkap / red flags (dari nota):

- Harga hanya dari Capterra snippet — confirm.
- BM UI, WhatsApp, multi-branch dashboard tak disahkan.
- Tiada info API / export.

3.5 ClassFlow.my — Malaysia (mungkin dev shop luar)

Website & demo route: <https://classflow.my/> — BM site <https://classflow.my/ms/>, blog <https://classflow.my/blog/tuition-centre-management-software-malaysia/>. Sister site Sri Lanka <https://classflow.lk/pricing>. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: Origin tak pasti (ada sister site .lk → mungkin dev shop multi-negara). Segment: kindergarten, tadika, taska, tuition, enrichment. Customer count tak jumpa. Harga: **dari RM89/bulan**.

Whole system in 5 lines:

1. Modul: **face-scan attendance**, automated billing, parent app, AI tools, e-Invoice LHDN (disenaraikan dalam services).
2. User: admin web, parent app Android "ClassFlow" (`com.classflowapp`); iOS tak confirm.
3. Flow: student → face-scan check-in → billing auto → parent app → e-Invoice.
4. BM + English site.
5. Blog aktif 2026, positioning "WhatsApp communication + multi-currency" sebagai keperluan MY.

Kenapa demo ni penting: Harga RM89 + e-Invoice + BM + face-scan attendance — kombinasi murah yang agresif. Tengok betul ke face-scan tu praktikal untuk kelas kecil, dan apa "AI tools" yang mereka maksudkan (idea untuk progress report AI).

Soalan khusus untuk vendor ni:

- ☐ Syarikat mana di belakang ClassFlow.my? Team di Malaysia atau Sri Lanka? Support jam MY?
- ☐ RM89 cover berapa student / berapa branch? Ada per-student add-on?
- ☐ Face-scan attendance: guna device apa (tablet di pintu)? Consent PDPA untuk biometric kanak-kanak macam mana?
- ☐ "AI tools" tu apa sebenarnya? Tunjuk live.
- ☐ E-Invoice: live atau "coming soon"? Tunjuk submission sebenar.
- ☐ WhatsApp: automated atau manual?
- ☐ iOS app ada?
- ☐ Pelanggan multi-branch ada?

Feature yang WAJIB screenshot / screen record:

- ☐ Face-scan attendance setup + live check-in screen
- ☐ Attendance report yang terhasil
- ☐ Automated billing setup + invoice
- ☐ Payment method (gateway) + receipt
- ☐ E-Invoice screen
- ☐ Parent app home + notifikasi
- ☐ AI tools screen (apa pun yang ada)
- ☐ BM UI vs EN UI (toggle)
- ☐ Multi-branch view (kalau ada)
- ☐ Pricing page + add-on list
- ☐ Settings & user roles

Perangkap / red flags (dari nota):

- Origin tak jelas (.lk sister) — risiko support & PDPA data residency.
- Hanya Android app disahkan.
- E-Invoice dari search snippet je — confirm live.

3.6 Skooly — global (MY & SG landing page)

Website & demo route: <https://getskooly.com/tuition-centre-software-malaysia/> (MY), <https://getskooly.com/tuition-centre-software-singapore/> (SG), app page <https://getskooly.com/schools/en/tuition-software-app.html>. **Free 14-day pilot** — sign up sendiri, then minta demo. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: HQ bukan MY (India-origin ikut satu nota; tak disahkan). Segment: tuition, academy. Claim "4,950 schools, 19,950 teachers, 10+ countries, US\$10m+ payments processed". Harga: tiga plan "priced openly in ringgit" tapi angka tak dapat diambil (gap) — **DuitNow & FPX dengan 0% Skooly fee**.

Whole system in 5 lines:

1. Plan basic: scheduling, attendance, invoicing, parent app. Plan mid ("Collection Suite"): **QR pada invoice**, automated reminder, **auto-reconciliation**, **check-in kiosk**, parent progress update. Plan premium: assessments, **multi-branch**, **tutor payroll**.
2. User: admin web, tutor, parent app.
3. Flow: schedule → attendance/kiosk → invoice dengan QR DuitNow → auto-reconcile → progress update.
4. Multi-branch hanya di plan premium.
5. Aktif 2026 (guide MY/SG).

Kenapa demo ni penting: Satu-satunya yang secara jelas tawar 0% fee FPX/DuitNow + auto-reconciliation + QR on invoice — ni exactly masalah "bank transfer screenshot" yang owner MY hadapi. Tutor payroll dan assessment pun jarang di vendor MY. Kau nak tengok macam mana reconciliation tu berfungsi.

Soalan khusus untuk vendor ni:

- ☐ Harga RM ketiga-tiga plan (bertulis)? Multi-branch di premium — 20 branch berapa?
- ☐ 0% fee FPX/DuitNow — siapa bayar gateway? Gateway mana? Settlement berapa hari?
- ☐ Auto-reconciliation: macam mana match bayaran ke invoice (reference number? webhook?) — tunjuk live dengan bayaran manual/cash
- ☐ Check-in kiosk: device apa, PIN / QR?
- ☐ Tutor payroll: kira ikut per class / per student / per jam? Export payslip?
- ☐ Team support di Malaysia? Jam?
- ☐ E-Invoice LHDN ada?
- ☐ WhatsApp reminder official API?

Feature yang WAJIB screenshot / screen record:

- ☐ Pricing page RM (ketiga plan)
- ☐ Invoice dengan QR DuitNow (contoh PDF / app)
- ☐ Auto-reconciliation screen: incoming payment matched vs unmatched
- ☐ Automated reminder rules + template
- ☐ Check-in kiosk UI
- ☐ Parent progress update screen (tutor side + parent side)
- ☐ Assessment module
- ☐ Multi-branch dashboard
- ☐ Tutor payroll calculation + report
- ☐ Class schedule view + attendance marking
- ☐ Parent app home
- ☐ Report & export list

Perangkap / red flags (dari nota):

- HQ luar negara — support timezone, PDPA data residency.
- Angka RM tak dapat diambil dalam research; "priced openly" kena verify.
- Multi-branch dikunci belakang plan paling mahal.
- Claim 4,950 schools — vendor claim.

3.7 Anak2U — Malaysia (preschool)

Website & demo route: anak2u.com.my — about <https://anak2u.com.my/about/>. App: Parent (iOS id1449444297 <https://apps.apple.com/my/app/anak2u-parent/id1449444297>, Android [com.anak2u.parent](https://play.google.com/store/apps/details?id=com.anak2u.parent)), Classroom (iOS <https://apps.apple.com/us/app/anak2u-classroom/id1574878178>), Teacher (Android https://play.google.com/store/apps/details?id=com.anak2u.teacher&hl=en_US). FB <https://www.facebook.com/anak2uofficial>. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: Malaysia (founders Wan Muzaffar Wan Hasim, Aniq, Mohamad Faizal Razak). Segment: preschool / kindergarten / childcare. Customer count tak jumpa. Harga (Software Finder / Vulcan Post snippet, **unverified**, basis one-off vs tahunan tak dinyatakan): Starter RM300, Premium Package RM4,000, Website Package RM2,000; **transaction fee per student RM3 atau 5% billing, mana lebih rendah.**

Whole system in 5 lines:

- Modul: data student/class/staff berpusat, **digital daily report** (nap, meal, attendance, toilet), paperless billing/invoice, in-app payment, invoice/receipt dalam app.
- Tiga app: Parent, Teacher, Classroom (tablet kelas) + white-label "TKC Parent" ([com.anak2u.tkcparent](https://play.google.com/store/apps/details?id=com.anak2u.tkcparent)).
- Flow: enrol → daily report per anak oleh teacher → parent app → invoice bulanan → bayar in-app.
- Monetisasi: pakej + transaction fee per student.
- Complaint app: video tak jumpa / tak boleh download, chat kena reopen app baru nampak, video teacher tak play.

Kenapa demo ni penting: Model tiga app (Parent / Teacher / Classroom) dan white-label parent app untuk chain ("TKC Parent") — ni pattern yang kau boleh guna untuk 20 branch. Juga contoh model harga pakej + RM3/student transaction fee.

Soalan khusus untuk vendor ni:

- ☐ RM300 / RM4,000 / RM2,000 tu one-off atau tahunan? Apa beza Starter vs Premium?
- ☐ Transaction fee RM3 atau 5% — kena bayar walaupun parent bayar cash?
- ☐ White-label app (macam TKC Parent) — kos & masa? Boleh untuk chain 20 branch satu app?
- ☐ Ada mode untuk reading/enrichment (session-based, bukan daily report)?
- ☐ Bug chat/notification & video — dah fix? Storage limit video?
- ☐ Gateway pembayaran mana? FPX / DuitNow?
- ☐ E-Invoice LHDN?
- ☐ Multi-branch view untuk HQ?

Feature yang WAJIB screenshot / screen record:

- ☐ Classroom app (tablet) — daily report entry UI
- ☐ Teacher app — attendance, report, chat
- ☐ Parent app — home, daily report, invoice, receipt, pay
- ☐ Admin web dashboard: student/class/staff
- ☐ Billing: invoice generation, transaction fee display
- ☐ Chat / messaging UI (dua-dua sisi)
- ☐ White-label app contoh (TKC Parent)
- ☐ Multi-centre view (kalau ada)
- ☐ Report & export
- ☐ Pricing / package sheet (minta PDF)

Perangkap / red flags (dari nota):

- Struktur harga keliru (one-off vs annual tak jelas) — dapatkan bertulis.
- Transaction fee per student naik dengan enrolment.
- Preschool workflow (nap/meal) bukan tuition.
- Bug chat/video berulang dalam review.

3.8 Oodlins — Malaysia (preschool)

Website & demo route: <https://oodlins.com/> — pricing <https://oodlins.com/pricing/>, about <https://oodlins.com/about/>, blog e-invoice <https://oodlins.com/blog/malaysia-e-invoice-schools-2026/>. iOS app <https://apps.apple.com/my/app/oodlins/id1469359974>. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: Malaysia origin, "serves hundreds of schools, expanding SEA". Segment: preschool / school. Harga: **dari RM89/bulan; parent account free; unlimited staff account; no long-term contract; RM5 per active student/bulan lebih had plan.**

Whole system in 5 lines:

1. Modul: student, class, attendance, billing, parent app, staff — standard preschool.
2. User: admin, unlimited staff, parent (free).
3. Flow: enrol → attendance → invoice → parent app.
4. Harga base + RM5/active student — model hybrid yang paling telus di MY.
5. Content marketing 2026 (7 best preschool systems; e-invoice prep guide) — tapi e-invoice sendiri "prep guide", bukan bukti live.

Kenapa demo ni penting: Model harga RM89 + RM5/active student adalah benchmark "fair pricing" untuk MY. "Unlimited staff, free parent" hilangkan objection per-seat. Tengok apa yang mereka define sebagai "active student" (ni penting untuk pricing kau).

Soalan khusus untuk vendor ni:

- ☐ "Active student" define macam mana? Student cuti sebulan kira?
- ☐ Had student dalam RM89 berapa? 20 branch × 120 student — kira berapa?
- ☐ E-Invoice: live dalam produk atau guide je?
- ☐ Gateway: FPX / DuitNow? Fee?
- ☐ WhatsApp reminder?
- ☐ Multi-branch HQ dashboard?
- ☐ Session-based class (bukan preschool harian) support?
- ☐ BM UI?

Feature yang WAJIB screenshot / screen record:

- ☐ Pricing page + calculator (kalau ada)
- ☐ Dashboard admin
- ☐ Student status (active/inactive) screen — cara mereka kira
- ☐ Attendance UI
- ☐ Billing setup + invoice + reminder
- ☐ Parent app (iOS) — home, invoice, pay
- ☐ Staff account & role
- ☐ Multi-school view
- ☐ Report & export
- ☐ E-Invoice (kalau ada)

Perangkap / red flags (dari nota):

- Per-active-student surcharge — kos naik ikut enrolment.
- Preschool focus.
- E-Invoice hanya blog guide setakat nota.

3.9 Classcard (ex-Reportcard) — Dubai HQ, listing SG

Website & demo route: <https://www.classcardapp.com/> — pricing <https://www.classcardapp.com/pricing>, integrations <https://www.classcardapp.com/integrations>, WhatsApp help <https://help.classcardapp.com/en/article/whatsapp-integration-5zsg0f/>. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: HQ Dubai, UAE (satu nota; nota MY/SG kata listing SG wujud, HQ tak disahkan). Segment: academies, tuition, sports, music, dance. Claim **3,250+ schools/centres worldwide**. Harga flat: **Starter US\$99 / Growth US\$199 / Business US\$349 sebulan + small per-transaction fee; unlimited staff & student**. Growth = automations, AI assistance, accounting integration, instalment billing. Business = multi-step workflows, gift cards, SSO, AI chat. Enterprise boleh bawa gateway sendiri.

Whole system in 5 lines:

1. Modul: scheduling, attendance, billing (instalment), automations, AI assistant, gift cards, workflows.
2. Integration: **WhatsApp via Twilio (template messages untuk class & invoice reminder)**, Zoom, Lessonspace, Stripe, Razorpay, Zoho Books, Xero, ClassMarker, Zapier.
3. Flow: enquiry → enrol → schedule → attendance → invoice (instalment) → auto reminder WhatsApp → accounting sync.
4. Harga flat per centre, unlimited user — model "predictable" yang review suka.
5. Analog antarabangsa paling dekat untuk MY (WhatsApp + flat pricing + Razorpay).

Kenapa demo ni penting: Ni rujukan terbaik untuk "automation + WhatsApp template + accounting sync" yang dibuat betul. Tengok automation builder dan macam mana WhatsApp template diluluskan / dihantar. Juga tengok instalment billing dan gift card sebagai produk.

Soalan khusus untuk vendor ni:

- ☐ Multi-branch: 20 branch = satu account atau 20? Harga?
- ☐ WhatsApp Twilio: nombor MY boleh daftar? Kos per mesej? Template approval berapa lama?
- ☐ Gateway MY: Stripe MY (3%+RM1 FPX) atau boleh bawa Billplz/CHIP di Enterprise?
- ☐ Per-transaction fee berapa?
- ☐ Xero / Zoho — push invoice & payment? Bukku tak ada?
- ☐ AI assistant buat apa sebenarnya?
- ☐ Support timezone untuk MY?
- ☐ Data residency / PDPA?

Feature yang WAJIB screenshot / screen record:

- ☐ Pricing page (plan matrix)
- ☐ Automation builder (trigger → action) dan senarai trigger
- ☐ WhatsApp template setup + log
- ☐ Class schedule + attendance
- ☐ Invoice + instalment plan setup
- ☐ Payment page (Stripe/Razorpay) + receipt
- ☐ Accounting integration setup (Xero/Zoho)
- ☐ Multi-step workflow (Business)
- ☐ AI chat / AI assistance screen
- ☐ Gift card / package product
- ☐ Parent/student portal
- ☐ Reports
- ☐ Zapier integration list

Perangkap / red flags (dari nota):

- USD pricing (US\$99-349 ≈ RM450-1,600/centre) — mahal untuk MY, tapi ambil pattern.
- Twilio markup atas Meta fee.
- Tak ada FPX/DuitNow native.

3.10 Taidii — Singapore

Website & demo route: <https://www.taidii.com/> — PSG listing <https://grants.gobusiness.gov.sg/support/productivity-solutions-grant/psg-directory/taidii-smart-it-solution-for-preschool-pms-e-form>. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: Singapore. Segment: kindergarten, childcare, enrichment/tuition, independent & international school. Customers: MindChamps, M.Y World Preschool; claim "over half of private school market SG". Presence China, UAE, Australia, Philippines. PSG-eligible. Harga: tak jumpa.

Whole system in 5 lines:

1. **Lima suite:** fee/enrolment, curriculum/child development, parent engagement, teacher development, daily ops.
2. User: HQ, principal, teacher, parent.
3. Flow: e-form enrolment → fee → daily ops → curriculum tracking → parent engagement.
4. Pelanggan chain besar (MindChamps) — bukti multi-branch skala.
5. Enterprise-grade preschool + enrichment.

Kenapa demo ni penting: Ni vendor yang serve chain preschool terbesar di SG. Tengok macam mana HQ chain control curriculum + fee + ops merentas puluhan centre. "Teacher development" suite jarang ada — idea untuk retention guru.

Soalan khusus untuk vendor ni:

- ☐ Ada pelanggan Malaysia? Harga RM? Team support MY?
- ☐ Enrichment/tuition workflow vs preschool — modul apa berbeza?
- ☐ HQ vs centre control: apa yang HQ lock (fee, curriculum, template)?
- ☐ Gateway MY (FPX/DuitNow)? PayNow je?

- ☐ E-Invoice LHDN?
- ☐ Teacher development suite — apa isi?
- ☐ E-form enrolment: boleh embed dalam website / FB ads?
- ☐ Harga per centre atau per child?

Feature yang WAJIB screenshot / screen record:

- ☐ HQ dashboard multi-centre
- ☐ E-form enrolment builder + parent view
- ☐ Fee module (plan, invoice, collection status)
- ☐ Curriculum / child development tracking UI
- ☐ Parent engagement app (feed, message)
- ☐ Teacher development module
- ☐ Daily ops (attendance, roster, incident)
- ☐ Report & analytics
- ☐ Permission matrix HQ / centre / teacher

Perangkap / red flags (dari nota):

- Harga & footprint MY tak diketahui; PSG-driven SG product.
- Mungkin overkill (enterprise) — cari bahagian yang relevan je.

3.11 ASIS — Malaysia (sekolah / tadika / tuisyen)

Website & demo route: <https://www.asis.my/> — modul page contoh <https://koperasitadikaminden.usm.my/perkhidmatan/modul-sistem-asis>. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: Malaysia, "Pilihan No 1 Sistem Sekolah Malaysia". Claim **500,000+ user, 3,000+ sekolah/preschool/tuition centre**; expand Indonesia, SG, Brunei. Harga tak public.

Whole system in 5 lines:

1. Modul "dari pendaftaran ke graduasi": registration, class, fees, **arrears**, invoice, receipt, pencapaian student/sekolah.
2. **Instalment payment** + kutipan via **PIBG**.
3. User: admin sekolah, guru, ibu bapa.
4. Flow: pendaftaran → kelas → yuran/tunggakan → resit → pencapaian.
5. Lebih sekolah-oriented (BM), segment tuition kurang jelas.

Kenapa demo ni penting: Incumbent BM untuk sekolah swasta/agama/tadika — 3,000+ install. Modul tunggakan (arrears) dan instalment adalah benda yang chain tuisyen perlukan tapi vendor SaaS baru selalu lupa. Tengok macam mana mereka handle tunggakan berbulan.

Soalan khusus untuk vendor ni:

- ☐ Ada versi untuk pusat tuisyen / enrichment (session-based)?
- ☐ Harga: per sekolah? one-off + support tahunan (macam SQL/AutoCount)?
- ☐ Multi-branch HQ view?
- ☐ Arrears: aging report, auto reminder, instalment plan — tunjuk
- ☐ Payment gateway FPX / DuitNow? Atau manual resit?
- ☐ E-Invoice LHDN?
- ☐ Parent app / WhatsApp?
- ☐ Cloud atau on-premise? Export data?

Feature yang WAJIB screenshot / screen record:

- ☐ Modul list (menu utama)
- ☐ Pendaftaran student form (field BM — bandingkan dengan APDM style: IC/MyKid, bangsa, agama, penjaga)
- ☐ Fee setup + instalment plan
- ☐ Arrears / tunggakan report + aging
- ☐ Invoice & receipt (BM format)
- ☐ Pencapaian / achievement record
- ☐ Parent portal
- ☐ Multi-school view
- ☐ Report list
- ☐ Settings / role

Perangkap / red flags (dari nota):

- Segment tuition tak jelas; UI mungkin school-legacy.
- Harga tak public; tak ada bukti gateway / e-invoice / WhatsApp dalam nota.

3.12 Synorex Tuition — Malaysia

Website & demo route: <https://synorex.group/tuition> — <https://edutech.synorex.group/>. Apps: iOS <https://apps.apple.com/my/app/synorex-tuition/id6468679664>, Android <https://play.google.com/store/apps/details?id=synorex.tuition&hl=en>. FB <https://www.facebook.com/SynorexTuition/>.

Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: Malaysia (Synorex Edutech). Segment: tuition. Harga tak jumpa — positioning "**unlimited students**", **flat monthly** "**regardless of whether you have 50 or 5,000 students**", no setup fee, no long-term commitment, 24/7 support, "24 powerful tools".

Whole system in 5 lines:

1. Modul: student, class scheduling, attendance, billing, fee collection, parent app, **branches**.
2. **Digital invoice hantar ke parent via WhatsApp dalam satu klik.**
3. User: admin web, iOS + Android app.
4. Flow: enrol → schedule → attendance → invoice → WhatsApp → bayar.
5. Sister product Synorex School (school.synorex.work).

Kenapa demo ni penting: Flat "unlimited students" adalah serangan terus pada model per-student AOne — kau kena tahu berapa harga sebenar dan apa yang dikorbankan. WhatsApp one-click invoice adalah UX yang owner MY suka.

Soalan khusus untuk vendor ni:

- ☐ Harga flat sebulan berapa? Per branch? 20 branch?
- ☐ "24 tools" — senarai penuh
- ☐ WhatsApp invoice: official API atau buka WhatsApp dengan pre-filled text (click-to-chat)?
- ☐ FPX / DuitNow gateway? Fee?
- ☐ E-Invoice LHDN?
- ☐ Branch HQ dashboard?
- ☐ 24/7 support — betul? channel apa?
- ☐ Berapa centre guna sekarang?

Feature yang WAJIB screenshot / screen record:

- ☐ Senarai 24 tools (menu)
- ☐ Class scheduling + attendance UI
- ☐ Invoice + butang "send via WhatsApp" + apa yang parent terima
- ☐ Payment flow parent
- ☐ Parent app (iOS) home
- ☐ Branch switch / HQ view
- ☐ Reports
- ☐ Settings & roles
- ☐ Pricing (minta bertulis)

Perangkap / red flags (dari nota):

- Tak ada harga public, tak ada customer count.
- "Unlimited" mungkin cover WhatsApp click-to-chat sahaja (bukan automation).

3.13 Yuran.my (+ YuranPay, Herepay) — Malaysia (fee-collection-first)

Website & demo route: <https://yuran.my/> — artikel <https://yuran.my/pengurusan-yuran-untuk-pusat-tuisyen/>, <https://yuran.my/tuition-centre-management-system-malaysia/>. FB <https://www.facebook.com/yuran.my/>. YuranPay <https://yuranpay.com/> (Bayarcash gateway). Herepay <https://www.herepay.org/sistem-kutipan-yuran-tuisyen/>. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: Malaysia, BM-first. Segment: tuition, sekolah, sports club, persatuan. Harga tak dapat diambil. Iklan YouTube Shorts "Sistem Kutipan Yuran Harga Berpatutan Untuk Pusat Tuisyen".

Whole system in 5 lines:

1. Fokus **kutipan yuran**: FPX, DuitNow, e-wallet, kad; auto reminder via web & **WhatsApp**; "detect dishonest staff" (kawalan kebocoran cash).
2. User: admin, parent (link bayaran).
3. Flow: student → invoice → reminder WhatsApp → bayar → resit auto.
4. Bukan full ops (schedule/attendance lemah atau tiada).
5. YuranPay & Herepay = gateway vendor yang pakai marketing "sistem kutipan yuran".

Kenapa demo ni penting: Ni layer bayaran yang paling BM dan paling murah — pelanggan kau yang single-centre mungkin guna ni + Excel. "Detect dishonest staff" adalah selling point sebenar (cash leakage) yang kau patut ada.

Soalan khusus untuk vendor ni:

- ☐ Harga: subscription atau per transaksi? Fee FPX/DuitNow berapa?
- ☐ Gateway belakang siapa (Bayarcash? lain)?
- ☐ "Detect dishonest staff" — macam mana secara teknikal (cash log vs bank)?
- ☐ WhatsApp reminder: API atau manual?
- ☐ Ada attendance / schedule langsung?
- ☐ E-Invoice LHDN?
- ☐ Multi-branch reporting?
- ☐ Export ke accounting?

Feature yang WAJIB screenshot / screen record:

- ☐ Invoice creation + bulk invoice bulanan
- ☐ Reminder schedule + WhatsApp message contoh
- ☐ Payment link page (FPX/DuitNow QR/e-wallet)
- ☐ Resit auto
- ☐ Cash collection log / staff control screen
- ☐ Outstanding / arrears dashboard
- ☐ Multi-branch report
- ☐ Settings (fee type, discount)
- ☐ Pricing (bertulis)

Perangkap / red flags (dari nota):

- Payment-only — tak boleh jadi sistem penuh.
- Harga tak public; bergantung pada gateway partner.

3.14 Tuis.my — Malaysia (BM-first)

Website & demo route: <https://www.tuis.my/> — Windows app <https://apps.microsoft.com/detail/9p7w4ndpl274?hl=en-US&gl=US>. **Free ≤15 student** — sign up sendiri dulu. Cari butang Book a Demo / Contact di homepage (WhatsApp lebih cepat).

HQ / segment / pelanggan / harga: Malaysia, BM. Segment: tuisyen, tadika, taska, tahfiz, kelas Quran, akademi bahasa, coding. Free ≤15 student, tiada kad kredit; paid tier tak diambil.

Whole system in 5 lines:

1. Modul: student, kelas/jadual, kehadiran digital, invoice, laporan, **multiple branches**.
2. User: admin (web + Windows desktop app), parent (login dengan Centre Code + password yang dihantar **manual via WhatsApp**).
3. Flow: daftar → kelas → kehadiran → invoice → laporan.
4. Tiada bukti gateway, e-invoice, iOS/Android.
5. Kemungkinan produk 1–3 orang.

Kenapa demo ni penting: Ni contoh terbaik "BM-first, simple, free" — tengok bahasa UI dan istilah BM yang parent/admin Melayu selesa (kehadiran, yuran, resit, penjaga). Copy vocabulary, bukan feature.

Soalan khusus untuk vendor ni:

- ☐ Harga paid tier?
- ☐ Siapa team? Berapa centre?
- ☐ Multi-branch: HQ view ada?
- ☐ Payment gateway / FPX?
- ☐ Mobile app parent?
- ☐ E-Invoice?
- ☐ Export data?

Feature yang WAJIB screenshot / screen record:

- ☐ Semua menu BM (label & istilah)
- ☐ Borang daftar student & penjaga (BM)
- ☐ Jadual kelas
- ☐ Kehadiran digital UI
- ☐ Invoice & resit BM
- ☐ Parent portal (Centre Code login)
- ☐ Laporan
- ☐ Windows desktop app (kalau berbeza)
- ☐ Branch setup

Perangkap / red flags (dari nota):

- Onboarding parent manual via WhatsApp — tak scale.
- Platform risk (team kecil, dokumentasi nipis).

3.15 illumine — India origin, MY landing page (preschool)

Website & demo route: <https://try.illumine.app/mly> (MY page) — blog <https://illumine.app/blog/school-management-systems-malaysia>. App [com.illumine.app](https://apps.apple.com/illumine.app), iOS id 1459249394. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: India-built; "Malaysia's #1 preschool management app", "saves 35+ hours a month". Segment: taska/tadika. Harga RM tak diambil. Billing integrasi **RinggitPay**.

Whole system in 5 lines:

1. Modul: **QR check-in/out**, parent app daily report, health/immunisation record, billing, komunikasi.
2. User: admin, teacher app, parent app.
3. Flow: QR check-in → daily activity → parent app → invoice → RinggitPay.
4. Review: bagus untuk komunikasi; complaint video storage limit, notifikasi kena reopen app, support lambat.
5. Content marketing MY aktif 2025–2026.

Kenapa demo ni penting: QR check-in/out yang matang + parent app yang parent MY dah review (positif & negatif). Model "India-built, MY landing page" tunjuk macam mana vendor luar localise (RinggitPay) — tengok mana yang mereka tak localise (BM? e-invoice?).

Soalan khusus untuk vendor ni:

- ☐ Harga RM per centre / per child?
- ☐ Team support MY? Jam?
- ☐ RinggitPay: FPX / DuitNow? Fee?
- ☐ E-Invoice LHDN?
- ☐ Video storage limit — berapa? Boleh tambah?
- ☐ Bug notifikasi — dah fix versi mana?
- ☐ Mode enrichment / session-based?
- ☐ BM UI?

Feature yang WAJIB screenshot / screen record:

- ☐ QR check-in/out (parent scan) + admin attendance log
- ☐ Teacher app: daily report entry, photo/video upload
- ☐ Parent app: feed, health record, invoice, pay
- ☐ Billing setup + RinggitPay flow
- ☐ Messaging UI
- ☐ Multi-centre dashboard
- ☐ Report & export
- ☐ Settings & role

Perangkap / red flags (dari nota):

- Support lambat (review), storage limit, notification bug.
- Preschool workflow.

3.16 Mekar — Malaysia (taska/tadika, BM)

Website & demo route: mekar.com.my — <https://www.mekar.com.my/my/solutions/tadika/pengurusan-kehadiran/>, landing negeri <https://www.mekar.com.my/my/lokasi/negeri-sembilan/>. **Free 30-day trial** — sign up sendiri. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: Malaysia, BM. Segment: taska & tadika. Harga **dari RM89/bulan**, trial 30 hari.

Whole system in 5 lines:

1. Modul: kehadiran digital, bil automatik, parent app, **laporan pematuhan JKM**.
2. User: admin, guru, ibu bapa.
3. Flow: daftar → kehadiran → bil → parent app → laporan JKM.
4. SEO landing page per negeri — marketing agresif BM.
5. Tiada info gateway / e-invoice / multi-branch.

Kenapa demo ni penting: Contoh regulatory-report-as-feature (JKM). Untuk kau, analognya laporan JPN/KPM untuk pusat tuisyen. Juga tengok BM UI dan parent app yang murah RM89.

Soalan khusus untuk vendor ni:

- ☐ RM89 cover berapa student/branch?
- ☐ Laporan JKM apa yang auto-generate?
- ☐ Gateway FPX / DuitNow?
- ☐ WhatsApp?
- ☐ E-Invoice?
- ☐ Multi-branch?
- ☐ Ada versi untuk tuisyen/enrichment?

Feature yang WAJIB screenshot / screen record:

- ☐ Menu BM penuh
- ☐ Kehadiran digital UI
- ☐ Bil automatik + resit
- ☐ Parent app
- ☐ Laporan JKM (template)
- ☐ Multi-cawangan (kalau ada)
- ☐ Settings
- ☐ Pricing

Perangkap / red flags (dari nota):

- Preschool-only; tiada bukti gateway / e-invoice / WhatsApp.

3.17 BooknGo — Singapore (booking-centric)

Website & demo route: bookngo.app — <https://www.bookngo.app/sg/about-us/>, guide <https://bookngo.app/sg/blog/tuition-centre-booking-system-singapore/>. Cari butang Book a Demo / Contact di homepage.

HQ / segment / pelanggan / harga: Singapore-built. Segment: tuition, enrichment. Harga tak diambil.

Whole system in 5 lines:

1. Modul: **term enrolment**, PayNow at checkout, **automated WhatsApp reminder**, attendance, **parent self-service**, **multi-branch**.
2. User: admin, parent (self-service web).
3. Flow: parent book term online → bayar PayNow → reminder WhatsApp → attendance.
4. Booking engine dulu, ops kemudian.
5. Content 2026 aktif.

Kenapa demo ni penting: Parent self-service term enrolment + bayar terus adalah flow "zero admin" yang vendor MY belum buat elok. Tengok macam mana mereka handle capacity, waitlist, dan term-based billing.

Soalan khusus untuk vendor ni:

- ☐ Harga? Per branch?
- ☐ MY: FPX/DuitNow ganti PayNow boleh?
- ☐ WhatsApp reminder: API? nombor MY?
- ☐ Waitlist & capacity per class?
- ☐ Make-up class flow?
- ☐ Multi-branch HQ report?
- ☐ Teacher app?
- ☐ Export data?

Feature yang WAJIB screenshot / screen record:

- ☐ Parent-facing booking page (term/class pick)
- ☐ Checkout + PayNow screen
- ☐ Admin: class capacity, waitlist
- ☐ WhatsApp reminder template
- ☐ Attendance UI
- ☐ Parent self-service portal (reschedule, invoice)
- ☐ Multi-branch view
- ☐ Reports

Perangkap / red flags (dari nota):

- SG-centric payment (PayNow); harga tak diketahui; ops depth mungkin cetek.

3.18 Tier 1B — vendor MY/SG lain (lawat website / WhatsApp tanya harga; demo kalau ada masa)

Vendor	URL (dari nota)	Apa dia	Apa nak tengok	Status
iEduCentre (SG)	https://www.ieducentre.com/ ; https://www.ieducentre.com/enrichment-centres	Modular: enquiry → scheduling, make-up lesson, attendance, fee, HR, teacher pay	Make-up lesson flow, teacher pay module	- []

4. Tier 2 — section per vendor

4.1 Jackrabbit Class — US

Website & demo route: <https://www.jackrabbitclass.com> — pricing <https://www.jackrabbitclass.com/pricing/>, enterprise <https://www.jackrabbitclass.com/enterprise/>, multi-location help <https://help.jackrabbitclass.com/help/multiple-business-locations-db>. Cari butang Book a Demo / Free Trial di homepage.

HQ / segment / pelanggan / harga: US (North Carolina, unverified). Dance, gym, swim, cheer, music, enrichment. Claim "12,000+ schools" / "7,000+ customers 25 countries" (dua angka bercanggah). Harga tier student: Class US\$49 (0-100 student) → US\$245 (3,001+); Plus+ US\$89 → US\$315; **bil ikut Active + Inactive student pada hari rawak setiap bulan.**

Whole system in 5 lines:

1. Modul: class, enrolment, attendance, billing, parent portal, staff portal, reporting.
2. **Business Intelligence Dashboard: 30+ KPI semua lokasi side-by-side; Executive Dashboard:** revenue, enrolment, alert semua family tanpa kira lokasi.
3. Multi-location: satu database vs database berasingan (ada help article pros/cons).
4. Flow: online registration → class → attendance → auto-bill → portal.
5. Tiada public API.

Kenapa demo ni penting: Rujukan terbaik untuk **cross-location KPI dashboard**. Kau nak tengok 30 KPI tu apa dan macam mana mereka susun. Juga contoh pricing model yang review benci (student sampling) — jangan tiru.

Soalan khusus:

- ☐ Tunjuk BI Dashboard & Executive Dashboard penuh — senarai KPI
- ☐ Satu DB vs banyak DB untuk 20 lokasi — mereka syor apa? kenapa?
- ☐ Kira staff pay per class taught? (nota: tak dapat verify)
- ☐ Move student antara class — berapa klik? (review: terlalu banyak)
- ☐ API ada?
- ☐ Support wait time (review: 2 minggu)

Feature yang WAJIB screenshot / screen record:

- ☐ BI Dashboard (semua widget)
- ☐ Executive Dashboard
- ☐ Multi-location switcher & settings
- ☐ Class schedule view + enrolment counts/capacity
- ☐ Attendance marking
- ☐ Family ledger / transaction screen (review: susah track)
- ☐ Auto-billing setup + fee posting
- ☐ Parent portal (registration, pay)
- ☐ Staff portal
- ☐ Report list
- ☐ Pricing page (student-count tiers)

Perangkap / red flags (dari nota): "Way too many buttons"; outdated UI; move student terlalu banyak klik; transaction tracking per family hampir mustahil; support appointment 2 minggu; payment processing keliru; user delete student untuk kurangkan bil. USD, US-payments.

4.2 iClassPro — US

Website & demo route: <https://www.iclasspro.com> — pricing <https://www.iclasspro.com/iclasspro-pricing>, FAQ <https://www.iclasspro.com/iclasspro-faqs>. Cari butang Book a Demo di homepage.

HQ / segment / pelanggan / harga: US (Texas). Gymnastics, swim, dance, cheer, enrichment. Harga **flat per location**: Signature US\$129 / Elite US\$199 / Premium US\$299 sebulan; "location" = tapak fizikal berbeza. **Branded App add-on US\$499 one-time + US\$150/bln.**

Whole system in 5 lines:

1. Modul: class, enrolment, attendance, billing, parent portal, staff, reports.
2. Flat per location — review puji "easy budgeting".
3. Branded parent app sebagai produk berbayar.
4. Flow: registration → class → attendance → bill (manual! — review) → portal.
5. Customisation parent portal "best done by developer".

Kenapa demo ni penting: Flat per-location pricing + branded app add-on = dua idea monetisasi untuk 20 branch. Tengok apa yang orang suka (navigation) dan apa yang mereka benci (no automated billing).

Soalan khusus:

- ☐ Automated recurring billing sekarang ada? (review lama: tiada)
- ☐ Branded app: apa yang boleh custom? masa deploy?
- ☐ 20 location — enterprise discount?
- ☐ API?
- ☐ Menu yang review kata "hard to find" — tunjuk settings

Feature yang WAJIB screenshot / screen record:

- ☐ Pricing page (per location + branded app)
- ☐ Location management screen
- ☐ Class list + schedule + capacity
- ☐ Attendance UI
- ☐ Billing screen (manual vs auto)
- ☐ Parent portal + branded app demo
- ☐ Staff/instructor management
- ☐ Reports
- ☐ Settings menu tree (untuk belajar apa yang confusing)

Perangkap / red flags (dari nota): "NO AUTOMATED BILLING"; menu susah cari; customisation perlu developer. USD, US-payments.

4.3 Pike13 — US (franchise)

Website & demo route: <https://www.pike13.com> — pricing <https://www.pike13.com/pricing-and-plans>, franchise <https://www.pike13.com/franchise-solutions>. Cari butang Book a Demo di homepage.

HQ / segment / pelanggan / harga: US (Seattle). Activity business & **franchise network** (swim, music, coding, martial arts). Essential US\$139 / Advanced US\$195 / Premium US\$249 sebulan (kontrak 12 bulan); Enterprise untuk franchise; 7-day trial. Claim pelanggan "world's #1 music education franchise", "largest international swim school franchise".

Whole system in 5 lines:

1. Modul: scheduling, enrolment, billing (auto-charge), staff time tracking, **payroll**, reporting (**Looker custom reporting**), **API**.
2. Franchise: centralised reporting & billing semua site.
3. Flow: enrol → schedule → check-in → auto-bill → payroll.
4. Review: quick learning curve, support bagus; tapi "buggy", billing auto-charge tanpa invoice, hidden charges, reporting lag.
5. Sesetengah pengguna guna sebab dipaksa franchisor.

Kenapa demo ni penting: Ni satu-satunya yang position sebagai **franchise stack** dengan payroll + time tracking + API. Kalau kau nak franchise-kan 20 branch, tengok apa yang franchisor perlukan: royalty report, centralised billing, staff clock-in.

Soalan khusus:

- ☐ Franchise: royalty / fee reporting ada? (nota: tak verify)
- ☐ Payroll: kira ikut class taught / jam?
- ☐ Looker reporting — tunjuk contoh dashboard franchise
- ☐ Auto-charge vs invoice-first — boleh pilih?
- ☐ API scope
- ☐ Hidden charges yang review sebut — tunjuk family billing view

Feature yang WAJIB screenshot / screen record:

- ☐ Franchise / multi-site dashboard
- ☐ Centralised billing screen
- ☐ Staff time clock + payroll report
- ☐ Looker custom report contoh
- ☐ Schedule + check-in UI
- ☐ Family account billing view
- ☐ Client app / portal
- ☐ API docs page
- ☐ Pricing page

Perangkap / red flags (dari nota): Buggy & inconsistent; auto-bill tanpa invoice; charges tersembunyi; settings di tempat pelik; reporting lag; kontrak 12 bulan.

4.4 TutorCruncher — UK

Website & demo route: <https://tutorcruncher.com> — pricing <https://tutorcruncher.com/pricing/us>, API <https://tutorcruncher.com/api/>, branches help <https://help.tutorcruncher.com/en/articles/8229034-branches>. 2-week trial — sign up sendiri. Cari butang Book a Demo di homepage.

HQ / segment / pelanggan / harga: UK (London). Tutoring agency, multi-branch, international. Harga revenue-share: Pay-as-you-go US\$30/bln + 1% revenue; Startup 0.65%; Enterprise custom; **+US\$50/branch/bln**; priority support US\$120/bln; extra untuk custom domain, international card.

Whole system in 5 lines:

1. Data model: Client → Recipient (student) → Service → Appointment → Invoice → Payment + Contractor (tutor) payout.
2. **Branches:** reporting, user, tax setting, billing flow berasingan — boleh lain negara.
3. **Tutor payroll:** per student rate, revenue share, auto payout.
4. **API:** REST, 100 req/min, webhook 150+ event, OpenAPI + Postman; integrasi Zapier, GoCardless, Xero, QuickBooks, Lessonspace.
5. Email + SMS, **tiada WhatsApp**.

Kenapa demo ni penting: Data model & API paling matang dalam segment — ini schema yang kau boleh pinjam. Branch model dengan tax/billing berasingan relevan kalau kau ada entiti berbeza per negeri. Tutor payout model pun rujukan.

Soalan khusus:

- ☐ Tunjuk branch setup + laporan per branch
- ☐ Tutor pay rules: per lesson / per student / % — tunjuk config & payout run
- ☐ Webhook event list + contoh payload
- ☐ Kalender sync (review: masalah)
- ☐ Total kos sebenar untuk 20 branch (1% + \$50×20)
- ☐ Support timezone Asia?

Feature yang WAJIB screenshot / screen record:

- ☐ Branch settings & branch switcher
- ☐ Client / Recipient / Contractor record
- ☐ Service & Appointment (lesson) creation
- ☐ Invoice generation + payment
- ☐ Contractor payout / payroll screen
- ☐ Dashboard (review: "cluttered" — tengok kenapa)
- ☐ API docs + webhook settings
- ☐ Xero/QuickBooks integration setup
- ☐ Pricing page

Perangkap / red flags (dari nota): Learning curve steep; navigation clunky; dashboard makin cluttered; calendar sync issue; support lambat lintas timezone; kos creep (branch, domain, card); no WhatsApp; % of revenue mahal pada yuran MY.

4.5 Teachworks — Canada

Website & demo route: <https://www.teachworks.com> — API <https://teachworks.com/addons/api>, pricing help <https://teachworks.zendesk.com/hc/en-us/articles/360004915113-Teachworks-Pricing>. 3-week trial — sign up sendiri. Cari butang Book a Demo di homepage.

HQ / segment / pelanggan / harga: Canada (unverified). Multi-tutor agency, test-prep, learning centre. Harga base + per student-lesson: Starter US\$16.49 + US\$0.32/lesson; Growth US\$47.99 + US\$0.189; Premium US\$187.99 + US\$0.065. API (65+ endpoint) Growth/Premium.

Whole system in 5 lines:

1. Modul: scheduling (drag-drop calendar, colour-coded, conflict detection), group lesson, attendance, invoicing, tutor payroll, booking plugin website.
2. Metered per lesson.
3. Review: "invoicing is a breeze", easy; tapi no autopay, no CRM/lead pipeline, no split payment, QuickBooks VAT sync issue, no 2-way Google Calendar.
4. Support response 2 jam (claim) tapi lambat waktu sibuk.
5. Flow: booking → lesson → attendance → invoice (manual charge) → payroll.

Kenapa demo ni penting: Kalender drag-drop dengan conflict detection adalah UI scheduling terbaik dalam segment — screen record penuh. Per-lesson metering pula contoh pricing yang align dengan usage tapi susah forecast.

Soalan khusus:

- ☐ Autopay sekarang ada?
- ☐ Lead pipeline / CRM ada?
- ☐ Calendar 2-way sync?
- ☐ Filter multiple instructor sekaligus?
- ☐ Tutor payroll config
- ☐ API endpoint list

Feature yang WAJIB screenshot / screen record:

- ☐ Calendar (day/week/month), drag-drop, conflict warning
- ☐ Group lesson + attendance

- ☐ Invoice creation & send
- ☐ Payroll / tutor wage report
- ☐ Booking plugin (client-facing)
- ☐ Student / family profile
- ☐ Reports
- ☐ API/Postman docs
- ☐ Pricing page

Perangkap / red flags (dari nota): No autopay; no CRM; no split payment; Google Calendar 1-way; harga "expensive"; onboarding rely on docs.

4.6 Brightwheel — US (childcare)

Website & demo route: <https://mybrightwheel.com> — features <https://mybrightwheel.com/features/>, billing <https://mybrightwheel.com/features/billing/>, kiosk help <https://help.mybrightwheel.com/en/articles/1329844-set-up-a-check-in-kiosk>, QR <https://help.mybrightwheel.com/en/articles/8713191-set-up-a-qr-code-for-check-in-quick-scan>. Free basic tier — sign up sendiri. Premium: "speak to a specialist".

HQ / segment / pelanggan / harga: US (SF). Childcare/preschool. Raised US\$88.8m; claim 4.9★ dari 160,000+ review (vendor); Capterra 4.7 (3,254). Harga Premium quote-only; anggaran pihak ketiga US\$2–4/child/bln, processing 2.9% + US\$0.30 (**unverified**).

Whole system in 5 lines:

1. Parent app: real-time **activity feed** (photo/video/meal/nap), **daily report** automatik, messaging.
2. **Kiosk check-in:** 4-digit code tanpa smartphone; **Quick Scan QR;** digital signature + health screen; staff clock-in kiosk sama.
3. Billing: autopay, auto reminder & receipt, subsidy, payroll, expense.
4. Claim 90% preschool nampak on-time payment naik dengan autopay.
5. Complaint: pay date hanya 1 / 15; tak boleh bill advance; parent phone support terhad; cancel kena call; kos ikut enrolment.

Kenapa demo ni penting: Ni spec parent app yang jadi standard dunia: feed + report + check-in + autopay. Untuk pusat bacaan: tukar "daily report" jadi "progress note per session". Screen record kiosk & QR check-in flow penuh.

Soalan khusus:

- ☐ Harga per child sebenar (bertulis)
- ☐ Autopay: kad je atau ACH? (MY equivalent: FPX e-mandate)
- ☐ Pay date flexible sekarang?
- ☐ Multi-site owner dashboard?
- ☐ Data export
- ☐ Cancel process

Feature yang WAJIB screenshot / screen record:

- ☐ Kiosk check-in (PIN) + Quick Scan QR + signature + health screen
- ☐ Staff clock-in
- ☐ Teacher app: post activity, photo, daily report
- ☐ Parent app: feed, daily report, message, invoice, autopay setup
- ☐ Admin billing: plan, invoice run, reminder, receipt
- ☐ Attendance report
- ☐ Multi-site view
- ☐ Reports & export
- ☐ Settings / permissions

Perangkap / red flags (dari nota): Billing rigid (dates), reporting limitations, glitches, cancel friction, cost scales with enrolment, US-only payments.

4.7 Family — Denmark/UK (childcare, multi-site)

Website & demo route: <https://www.family.co> — pricing <https://www.family.co/us/pricing>, multi-site <https://www.family.co/us/blog/family-for-multisite-childcare-centers>, org reports <https://help.family.co/en/articles/5316863-organisational-level-reports>, occupancy <https://help.family.co/en/articles/4912131-occupancy-and-future-availability>. Free version/trial — sign up sendiri. Cari butang Book a Demo di homepage.

HQ / segment / pelanggan / harga: Copenhagen & London. Childcare. Claim 7,000+ centre. Harga **Starter dari US\$49/bln**, tier ikut child count, semua feature included.

Whole system in 5 lines:

1. Parent app: daily update, photo, messaging **auto-translate 130+ bahasa**, "**Sidekick**" AI semak ejaan/tone.
2. **Organizer Manager:** live cross-site analytics — enrolment, occupancy, revenue, outstanding balance, engagement; drill ke site.
3. **Org-level Occupancy Report** per site + total; CSV export booking semua site 2 tahun.
4. Role-based view: teacher / director / owner.
5. Check-in/out, billing & invoicing.

Kenapa demo ni penting: Occupancy / future availability report merentas site adalah exactly "utilisasi slot kelas" yang chain kau perlukan. Auto-translate + AI writing assist untuk mesej parent pun idea terus untuk BM/EN/中文.

Soalan khusus:

- ☐ Tunjuk Organizer Manager penuh
- ☐ Occupancy & future availability — logik kira
- ☐ Sidekick AI — apa dia buat, boleh off?
- ☐ Auto-translate BM ada?
- ☐ Harga 20 site ~2,500 child
- ☐ Session-based (bukan full-day) support?

Feature yang WAJIB screenshot / screen record:

- ☐ Organizer Manager dashboard (cross-site)
- ☐ Occupancy report + future availability
- ☐ Site drill-down: invoice & payment
- ☐ CSV export screen
- ☐ Parent app: feed, message dengan translate, Sidekick
- ☐ Check-in/out
- ☐ Billing setup & invoice
- ☐ Role views (teacher vs director vs owner)
- ☐ Pricing page

Perangkap / red flags (dari nota): Childcare-specific; USD; no MY payments. (Sedikit complaint dalam nota — bagus.)

4.8 Playground (ex-Kinderlime) — US (childcare)

Website & demo route: <https://www.tryplayground.com> — GetApp <https://www.getapp.com/education-childcare-software/a/playground/>. Free version & trial tanpa kad — sign up sendiri. Cari butang Book a Demo di homepage.

HQ / segment / pelanggan / harga: US. Childcare. Claim 5,000+ program; Captterra 4.8 (193). Harga custom.

Whole system in 5 lines:

1. Modul: billing, registration, communication, attendance, payroll.
2. Review: "beats Brightwheel and Procure... app and desktop terrific".
3. Free tier + trial.
4. Flow: registration → attendance → communication → billing → payroll.
5. Lineage Kinderlime tak disahkan.

Kenapa demo ni penting: Challenger yang review kata lebih baik dari Brightwheel — tengok apa UX yang buat orang switch. Cepat, free, tak perlu demo pun.

Soalan khusus:

- ☐ Apa beza utama vs Brightwheel (dari mereka sendiri)?
- ☐ Multi-site?
- ☐ Autopay?
- ☐ Harga

Feature yang WAJIB screenshot / screen record:

- ☐ Onboarding flow (free signup) — belajar activation UX
- ☐ Admin dashboard
- ☐ Registration form builder
- ☐ Attendance / check-in
- ☐ Messaging
- ☐ Billing & autopay
- ☐ Payroll
- ☐ Parent app
- ☐ Reports

Perangkap / red flags (dari nota): Sedikit data; harga tak public; US.

4.9 Xplor Education — Australia (childcare)

Website & demo route: <https://www.ourxplor.com> — pricing <https://www.ourxplor.com/pricing/>, Home app <https://www.ourxplor.com/home-families/>, Playground <https://www.ourxplor.com/playground-educator-childcare-software/>. Cari butang Book a Demo di homepage.

HQ / segment / pelanggan / harga: Melbourne. Childcare (tied to Australian CCS subsidy). Harga quote; bundle.

Whole system in 5 lines:

1. Produk split: **Office** (admin), **Playground** (educator app), **Home** (family app), **Xplor Pay**.
2. Home app: "Learning Journey" photo/video, chat, health analytics, **book extra sessions**, subsidy & payment due, Messenger.
3. Kiosk check-in sync attendance timestamp.
4. Integrasi OWNA, Xero.
5. Billing engine CCS-specific (tak portable).

Kenapa demo ni penting: Split 3 app (admin / educator / family) + Pay adalah arkitektur produk yang bersih — rujukan untuk kau bahagikan app. "Book extra session" dalam family app = make-up class self-service.

Soalan khusus:

- ☐ Tunjuk ketiga-tiga app
- ☐ Book extra session flow (capacity check?)
- ☐ Xplor Pay: recurring debit macam mana
- ☐ Xero sync scope
- ☐ Non-AU customer ada?

Feature yang WAJIB screenshot / screen record:

- ☐ Office admin dashboard
- ☐ Playground educator app (observations, attendance)
- ☐ Home family app: Learning Journey, chat, book session, payments
- ☐ Kiosk check-in
- ☐ Xplor Pay setup
- ☐ Xero integration
- ☐ Reports

Perangkap / red flags (dari nota): CCS-specific billing; AU only; quote pricing.

4.10 Classe365 — SIS modular

Website & demo route: <https://www.classe365.com/pricing> — rate card <https://docs.classe365.com/en/articles/1921193-classe365-features-and-pricing-rate-card>. Free trial — sign up sendiri. Cari butang Book a Demo di homepage.

HQ / segment / pelanggan / harga: Global SMB SIS/LMS/CRM. Harga: US\$100/bln (1–100 student); US\$250 (101–500); US\$500 (501–1000); enterprise quote; "dari US\$23/student/tahun". **Modular — bayar modul yang perlu (LMS / CRM / SIS).**

Whole system in 5 lines:

1. SIS + LMS + CRM dalam satu, pilih modul.
2. Tier ikut student count.
3. Flow: CRM (lead) → admission → SIS (class, attendance, grade) → fee → LMS.
4. Ada CRM/admission funnel — jarang di vendor MY.
5. Enterprise per-student pricing.

Kenapa demo ni penting: Rujukan untuk **lead pipeline / admission CRM** yang bersambung terus ke enrolment — sesuatu yang hampir semua Tier 1 tak ada. Juga model modular pricing.

Soalan khusus:

- ☐ CRM: pipeline stages, automation, form embed
- ☐ Admission → enrolment handoff
- ☐ Fee module: recurring, gateway
- ☐ Multi-campus
- ☐ Rate card modul (bertulis)

Feature yang WAJIB screenshot / screen record:

- ☐ Module selector / rate card
- ☐ CRM pipeline (kanban) + lead form
- ☐ Admission workflow
- ☐ Student profile + attendance + gradebook
- ☐ Fee & invoice
- ☐ LMS (sekilas)
- ☐ Multi-campus settings
- ☐ Reports

Perangkap / red flags (dari nota): Tier ladder bercanggah antara sumber (501–750 vs 501–1000) — verify. Generic school, bukan tuition.

4.11 Gradelink — US (SMB SIS)

Website & demo route: URL rasmi tak ada dalam nota; guna listing Capterra <https://www.capterra.com/p/118900/Gradelink-SIS/pricing/> dan GetApp <https://www.getapp.com/education-childcare-software/a/gradelink-sis/> untuk pautan ke website, then cari butang Book a Demo.

HQ / segment / pelanggan / harga: US. Small private school SIS. Harga public: US\$121/bln (≤50 student), US\$164 (51–100), US\$210 (101–150). Review: value bagus, UI "outdated and old".

Whole system in 5 lines:

1. SIS standard: enrolment, attendance, gradebook, report card, parent portal, billing.
2. Harga transparent ikut student.
3. Small school focus.
4. Flow: enrol → class → attendance → grade → report card → bill.

5. UI lama.

Kenapa demo ni penting: Contoh pricing transparent per-student untuk sekolah kecil (≈RM5-12/student/bulan) — anchor harga untuk segment tadika/sekolah swasta kecil. Report card builder pun rujukan untuk progress report.

Soalan khusus:

- ☐ Report card template builder
- ☐ Billing & payment gateway
- ☐ Multi-school
- ☐ Harga >150 student

Feature yang WAJIB screenshot / screen record:

- ☐ Pricing page
- ☐ Gradebook + report card builder + PDF
- ☐ Attendance
- ☐ Parent portal
- ☐ Billing
- ☐ Admin dashboard (nota: "outdated" — tengok apa yang buat rasa lama)

Perangkap / red flags (dari nota): UI outdated; US; school bukan tuition.

4.12 Fedena (Foradian) — India (school ERP, open-source roots)

Website & demo route: <https://fedena.com/pricing-and-plans> — community edition GitHub <https://github.com/projectfedena/fedena>. Cari butang Book a Demo di homepage.

HQ / segment / pelanggan / harga: India. School ERP. Free community edition (Rails lama, Apache-2.0) + Pro annual licence (harga tak diambil).

Whole system in 5 lines:

- Modul: administration, student lifecycle, communication, fee, exam, timetable.
- Foradian pernah fork **FET** untuk auto-timetable headless — bukti SIS komersial embed engine open source.
- Community edition boleh install sendiri untuk baca data model.
- Flow: admission → class → attendance → exam → fee.
- Rails 2-era — jangan reuse code, tengok feature list je.

Kenapa demo ni penting: Benchmark "checklist feature" pasaran India/SEA (hostel, transport, library, ID card, SMS) — untuk tahu apa yang pelanggan sekolah swasta akan tanya walaupun kau tak buat. Auto-timetable via FET adalah idea teknikal.

Soalan khusus:

- ☐ Beza community vs Pro
- ☐ Auto-timetable masih guna FET?
- ☐ Multi-school
- ☐ Harga Pro (annual)

Feature yang WAJIB screenshot / screen record:

- ☐ Module list (Pro)
- ☐ Timetable generator UI
- ☐ Fee module
- ☐ Exam / report card
- ☐ Communication (SMS/email)
- ☐ Multi-school admin
- ☐ Pricing page

Perangkap / red flags (dari nota): Codebase lama; India-centric; harga tak jelas.

Cadangan urutan (6 minggu):

- Minggu 1: hantar SEMUA email/WhatsApp Tier 1 sekaligus (vendor MY lambat respond). Sambil tunggu, buat Tier 3 (Respond.io, Trello, Airtable, Fresha, ClassDojo) dan sign up free plan REMMU / Tuis.my / Mekar / Skooly pilot.
- Minggu 2-3: demo Tier 1 (target 2 sehari max — lebih dari tu kau tak ingat apa-apa).
- Minggu 4: demo Tier 2 (Jackrabbit, TutorCruncher, Brightwheel, Famly dulu — paling banyak idea).
- Minggu 5: Tier 2 baki + open source install.
- Minggu 6: isi comparison matrix, tulis "apa yang kita curi / apa yang kita elak".

7. Selepas semua demo — comparison matrix

Isi cell dengan ✓ (ada, tengok sendiri), ✗ (tiada / vendor confirm tiada), ⦿ (partial / add-on berbayar / "coming soon"), ? (tak tanya). Tambah column ikut vendor yang kau demo; copy table ni ke Google Sheet lebih senang.

#	Feature	AOne	REMMU	SimTrain	ClassFlow	Skooly	Synorex	Classcard	Oodlins	LittleLives	Anak2U	Taidii	ASIS	Yuran.my
1	Multi-branch dalam satu login + HQ dashboard													
2	Branch-scoped role & permission													
3	Class allocation (student ↔ slot ↔ teacher) + capacity per class													
4	Timetable / schedule view (week, per teacher, per room)													
5	Attendance marking (teacher app / kiosk / QR / face)													
6	Auto no-show + parent notification													
7	Make-up / replacement class credit (dengan expiry)													
8	Waitlist (auto-fill bila slot kosong)													
9	Fee plan + invoice auto bulanan													
10	FPX / DuitNow QR / e-wallet (gateway & fee)													

#	Feature	AOne	REMMU	SimTrain	ClassFlow	Skooly	Synorex	Classcard	Oodlins	LittleLives	Anak2U	Taidii	ASIS	Yuran.my
11	Recurring collection (FPX e-mandate / card token / autopay)													
12	Cash / manual transfer reconciliation + partial payment + sibling discount													
13	Arrears / aging report + auto reminder													
14	LHDN e-Invoice (consolidated bulanan + parent request individual)													
15	WhatsApp reminder (official API? template? siapa bayar)													
16	WhatsApp two-way inbox / lifecycle stage													
17	Parent app (iOS/Android/Huawei) + web login													
18	Teacher app (attendance + progress note)													
19	Progress report / portfolio per student (PDF, BM/EN)													
20	Lead pipeline / enquiry CRM → trial → enrol													
21	Online enrolment / booking form (parent self-service)													
22	Reports / BI dashboard cross-branch (enrolment, attendance rate, revenue, outstanding, utilisation)													
23	Teacher payroll per class / per student													
24	Data export penuh (CSV/Excel) + accounting sync (Bukku/SQL/AutoCount/Xero)													
25	Public API / webhook / Zapier													
26	BM UI (admin + parent) + auto-translate													
27	PDPA: data residency, DPO, breach process, export on exit													
28	Pricing model (per student / per branch / flat / % revenue) + RM/bulan untuk 20 branch													
29	Contract lock-in & onboarding time													
30	Support channel & jam (MY)													

Lepas isi matrix, jawab 3 soalan ni dalam satu page:

- ☐ Feature mana yang SEMUA Tier 1 ada (= table stakes, kau wajib ada hari pertama)?
- ☐ Feature mana yang TIADA di semua Tier 1 tapi ada di Tier 2/3 (= peluang beza: cross-branch BI, make-up credit, waitlist, lead pipeline, teacher payroll, auto-translate)?
- ☐ Red flag mana yang berulang (harga per student, parent mobile-only, WhatsApp manual, e-invoice add-on, app bug notifikasi, support WhatsApp group je) — ni senarai "jangan buat".
